## Counseling

### Clinical Counseling Services (CCS)

Independently licensed mental health care providers and certified alcohol and drug counselors staff the Clinical Counseling Services. These counselors provide assistance to individuals and couples as well as families. Services include marital counseling and counseling for children who are coping with the deployment of a spouse or parent. Along with life issues, the CCS provides interventions for the trauma resulting from domestic violence and rape or sexual assault. Advocacy services that can assist a victim through the aftermath of a trauma are available for victims of these crimes. Services are also available to persons who use violence in their intimate relationships. Alcohol and drug counselors work with those people who either abuse or have a dependency on drugs or alcohol. Individual and group programs are included in substance abuse services. CCS offers classes on a variety of topics including parenting skills, anger management, conflict resolution, and stress management.
